FASTER DOWNLOADS, SMOOTHER STREAMING

MU-MIMO Matters

WHY MU-MIMO?

Multiple Users, Multiple Devices, Faster & More Reliable WiFi Performance

Go fast on all your devices

Say goodbye to bandwidth congestion. Stream, game, play music and download files - all at the same time.

Go low on latency

No more rubberbanding while gaming. Enjoy a stable, low variance gaming experience.

Boost your network performance

All devices benefit when there's more sharing and less competing for data transmission.

Increase Speed, Throughput and Capacity of Your Network

Take advantage of the MU-MIMO capable routers to get efficient and optimized WiFi performance for your connected home. As compared to the traditional routers that communicate with one device at a time, the newest class of WAVE 2 MU-MIMO routers can stream simultaneously to multiple devices.* By streaming simultaneously, WiFi is used more efficiently and the client devices get their data faster!

AVERAGE THROUGHPUT WITH THREE CLIENTS

NETGEAR
WiFi Router
with MU-MIMO

180 Mbps

Traditional
WiFi Router

99 Mbps

Performance Boost for all your Streaming, Gaming and Surfing

WHY MU-MIMO?

Less Lag For Better Performance

If you have multiple users using multiple devices, MU-MIMO is critical for your network efficiency

* MU-MIMO capability requires both router and client device to support MU-MIMO

#1 spot on AC2600 Router Ranking for MU-MIMO Performance (March 2016)

TEST RESULTS ([HTTP://WWW.SMALLNETBUILDER.COM/WIRELESS/WIRELESS-
REVIEWS/32975-MU-MIMO-RETEST-SIX-ROUTERS-COMPARED](http://www.smallnetbuilder.com/wireless/wireless-reviews/32975-mu-mimo-retest-six-routers-compared))

* To get the most of this next gen WAVE 2 technology, your devices must also support MU-MIMO. Please check with your manufacturer if your device supports it.
